SAFETY DATA SHEET

1. Identification

Product identifier Clozapine

Other means of identification
Catalog number 1142107
Chemical name 5H-Dibenzo[b,e][1,4]diazepine, 8-chloro-11-(4-methyl-1-piperazinyl)-

Recommended use Specified quality tests and assay use only.

Recommended restrictions Not for use as a drug. Not for administration to humans or animals.

Manufacturer/Importer/Supplier/Distributor information
Company name U. S. Pharmacopeia
Address 12601 Twinbrook Parkway
          Rockville
          MD
          20852-1790
          US
Telephone RS Technical Services 301-816-8129
Website www.usp.org
E-mail RSTECH@usp.org
Emergency phone number CHEMTREC within US & Canada 1-800-424-9300
CHEMTREC outside US & Canada +1 703-527-3887

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Acute toxicity, oral Category 3
Specific target organ toxicity, single exposure Category 3 narcotic effects

OSHA hazard(s) Not classified.

Label elements

Signal word Danger

Hazard statement Toxic if swallowed. May cause drowsiness or dizziness.

Precautionary statement
Prevention Use only outdoors or in a well-ventilated area. Wash thoroughly after handling. Do not eat, drink or smoke when using this product.
Response Call a poison center/doctor/medical professional. Rinse mouth. If inhaled: Remove person to fresh air and keep comfortable for breathing.
Storage Store in a well-ventilated place. Keep container tightly closed. Store locked up.
Disposal Dispose of contents/container to an approved disposal site.

Hazard(s) not otherwise classified (HNOC) Not classified.

3. Composition/information on ingredients

Substance

Hazardous components
Chemical name Clozapine
Common name and synonyms
CAS number 5786-21-0
% 100

Material name: Clozapine

USP SDS US 6491 Version #: 02 Revision date: 06-28-2013 Issue date: 06-17-2009
4. First-aid measures

**Inhalation**
If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. Call a physician if symptoms develop or persist.

**Skin contact**
Rinse skin with water/shower. Get medical attention if irritation develops and persists.

**Eye contact**
Rinse with water. Get medical attention if irritation develops and persists.

**Ingestion**
Rinse mouth. If ingestion of a large amount does occur, call a poison control center immediately. Do not induce vomiting without advice from poison control center. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. Do not use mouth-to-mouth method if victim ingested the substance.

**Most important symptoms/effects, acute and delayed**
Central nervous system depression.

**Indication of immediate medical attention and special treatment needed**
Treatment of clozapine overdose should be symptomatic and supportive and may include the following: Establish and maintain a patent airway. Ensure adequate oxygenation and ventilation. Induced vomiting is not recommended, due to the potential for CNS depression and seizures. To decrease absorption, administer activated charcoal as a slurry within 6 hours of ingestion. Activated charcoal, which may be used with sorbitol, may be more effective than gastric lavage. Consider gastric lavage if it can be performed within 1 hour of ingestion. Protect airway by placement in the Trendelenburg and left lateral decubitus position or by endotracheal intubation. Control any seizures first. Use physostigmine, dihydroergotamine, angiotensin, or norepinephrine to counteract anticholinergic symptoms. Treat hypotension with isotonic fluid infusion. If hypotension persists, administer dopamine or norepinephrine and titrate to desired response. Do NOT use quinidine or procainamide to treat cardiac arrhythmias. For seizures, administer diazepam or lorazepam. Consider phenobarbital or propofol if seizures recur after diazepam. Monitor for elevated liver enzymes, granulocytopenia, tachycardia, antimuscarinic effects, hypotension, dysrhythmias, respiratory depression, and need for endotracheal intubation. Evaluate for hypoglycemia, electrolyte disturbances, and hypoxia. Monitor cardiac and vital signs, especially respiration, for several days because of possibly delayed effects. Provide assisted ventilation, if needed. Forced diuresis, dialysis, hemoperfusion, and exchange transfusion are not likely to be of benefit. [USP DI 2005, Meditext 2009, and PDR 2009]

**General information**
Remove from exposure. Remove contaminated clothing. For treatment advice, seek guidance from an occupational health physician or other licensed health-care provider familiar with workplace chemical exposures. In the United States, the national poison control center phone number is 1-800-222-1222. If person is not breathing, give artificial respiration. If breathing is difficult, give oxygen if available. Persons developing serious hypersensitivity (anaphylactic) reactions must receive immediate medical attention.

5. Fire-fighting measures

**Suitable extinguishing media**
Water spray, dry chemical, carbon dioxide, or foam as appropriate for surrounding fire and materials.

**Unsuitable extinguishing media**
None known.

**Specific hazards arising from the chemical**
No unusual fire or explosion hazards noted.

**Special protective equipment and precautions for firefighters**
Wear suitable protective equipment.

**Fire-fighting equipment/instructions**
As with all fires, evacuate personnel to a safe area. Firefighters should use self-contained breathing equipment and protective clothing.

6. Accidental release measures

**Personal precautions, protective equipment and emergency procedures**
Keep unnecessary personnel away. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Avoid inhalation of dust from the spilled material. Wear appropriate personal protective equipment.

**Methods and materials for containment and cleaning up**
Sweep up or vacuum up spillage and collect in suitable container for disposal. Avoid the generation of dusts during clean-up. For waste disposal, see section 13 of the SDS. Wash spill site.

7. Handling and storage

**Precautions for safe handling**
As a general rule, when handling USP Reference Standards, avoid all contact and inhalation of dust, mists, and/or vapors associated with the material. Clean equipment and work surfaces with suitable detergent or solvent after use. After removing gloves, wash hands and other exposed skin thoroughly.

**Conditions for safe storage, including any incompatibilities**
Store in tight container as defined in the USP-NF. This material should be handled and stored per label instructions to ensure product integrity.
8. Exposure controls/personal protection

Exposure limit values

<table>
<thead>

<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clozapine (CAS 5786-21-0)</td>
<td>TWA</td>
<td>0.1 micrograms/m3</td>
</tr>
</tbody>
</table>

Biological limit values
No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls
Airborne exposure should be controlled primarily by engineering controls such as general dilution ventilation, local exhaust ventilation, or process enclosure. Local exhaust ventilation is generally preferred to general exhaust because it can control the contaminant at its source, preventing dispersion into the work area. An industrial hygiene survey involving air monitoring may be used to determine the effectiveness of engineering controls. Effectiveness of engineering controls intended for use with highly potent materials should be assessed by use of nontoxic surrogate materials.

Individual protection measures, such as personal protective equipment

Eye/face protection
Safety glasses with sideshields are recommended. Face shields or goggles may be required if splash potential exists or if corrosive materials are present. Approved eye protection (e.g., bearing the ANSI Z87 or CSA stamp) is preferred. Maintain eyewash facilities in the work area.

Skin protection
Chemically compatible gloves. For handling solutions, ensure that the glove material is protective against the solvent being used. Use handling practices that minimize direct hand contact. Employees who are sensitive to natural rubber (latex) should use nitrile or other synthetic nonlatex gloves. Use of powdered latex gloves should be avoided due to the risk of latex allergy.

Hand protection
For handling of laboratory scale quantities, a cloth lab coat is recommended. Where significant quantities are handled, work clothing may be necessary to prevent take-home contamination.

Other
For handling of laboratory scale quantities, a cloth lab coat is recommended. Where significant quantities are handled, work clothing may be necessary to prevent take-home contamination.

Respiratory protection
Where respirators are deemed necessary to reduce or control occupational exposures, use NIOSH-approved respiratory protection and have an effective respirator program in place (applicable U.S. regulation OSHA 29 CFR 1910.134).

Thermal hazards
Not available.

General hygiene considerations
Handle in accordance with good industrial hygiene and safety practice.

9. Physical and chemical properties

Appearance
Yellow, crystalline powder.

Physical state
Solid.

Form
Powder.

Odor
Weak odor.

Odor threshold
Not available.

pH
Not available.

Melting point/freezing point
359.6 - 366.8 °F (182 - 186 °C)

Initial boiling point and boiling range
Not available.

Flash point
Not available.

Evaporation rate
Not available.

Flammability (solid, gas)
Not applicable.

Upper/lower flammability or explosive limits
Flammability limit - lower (%)
Not available.

Flammability limit - upper (%)
Not available.

Explosive limit - lower (%)
Not available.

Explosive limit - upper (%)
Not available.

Vapor pressure
< 0.0000001 kPa at 25 °C

Vapor density
Not available.

Relative density
Not available.

Solubility in water
Insoluble.

Partition coefficient (n-octanol/water)
3.23

Auto-ignition temperature
> 680 °F (> 360 °C)
Decomposition temperature: Not available.
Viscosity: Not available.

Other information:
- **Chemical family**: Tricyclic dibenzodiazepine derivative.
- **Molecular formula**: C18H19ClN4
- **Molecular weight**: 326.82
- **Solubility (other)**: Soluble in alcohol, in acetone, and in chloroform; sparingly soluble in acetonitrile; freely soluble in methylene chloride.

10. Stability and reactivity

**Reactivity**: No reactivity hazards known.

**Chemical stability**: Stable at normal conditions.

**Possibility of hazardous reactions**: No dangerous reaction known under conditions of normal use.

**Conditions to avoid**: None known.

**Incompatible materials**: Strong oxidizing agents.

**Hazardous decomposition products**: NOx, Cl-. Irritating and/or toxic fumes or gases. Emits toxic fumes under fire conditions.

11. Toxicological information

**Information on likely routes of exposure**

**Ingestion**: Toxic if swallowed.

**Inhalation**: Due to lack of data the classification is not possible.

**Skin contact**: Due to lack of data the classification is not possible.

**Eye contact**: Due to lack of data the classification is not possible.

**Symptoms related to the physical, chemical, and toxicological characteristics**: Dizziness, Fainting, Fever, Weight gain, Anxiety, Irritability, Restlessness, Confusion, Blurred vision, Tremor, Headache, Constipation, Drowsiness, Salivation, Nausea, Vomiting, Heartburn, Sweating, Nervousness, Hallucinations, Seizures.

**Delayed and immediate effects of exposure**: Irregular heartbeat, Change in blood pressure, Cardiac arrest, Coma.

**Medical conditions aggravated by exposure**: Impaired kidney function, Myeloproliferative disease, Psychosis, Bone marrow suppression, Liver disease, Central nervous system depression, Blood disorders, Glaucoma, Intestinal obstruction, Enlarged prostate gland, History of seizures.

**Acute toxicity**: Toxic if swallowed.

Aspiration hazard

Based on available data, the classification criteria are not met.

12. Ecological information

Ecotoxicity

No ecotoxicity data noted for the ingredient(s).

Persistence and degradability

No data is available on the degradability of this product.

Bioaccumulative potential

Not available.

Mobility in soil

Not available.

Other adverse effects

Not available.

13. Disposal considerations

Disposal instructions

This product, in its present state, when discarded or disposed of, is not a hazardous waste according to Federal regulations (40 CFR 261.4 (b)(4)). Under RCRA, it is the responsibility of the user of the product to determine, at the time of disposal, whether the product meets RCRA criteria for hazardous waste. Dispose in accordance with all applicable regulations.

Local disposal regulations

Not available.

Hazardous waste code

Not regulated.

Waste from residues / unused products

Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging

Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied.

15. Regulatory information

US federal regulations

CERCLA/SARA Hazardous Substances - Not applicable.

One or more components are not listed on TSCA.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

Hazard categories

Immediate Hazard - Yes
Delayed Hazard - No
Fire Hazard - No
Pressure Hazard - No
Reactivity Hazard - No

SARA 302 Extremely hazardous substance

No

SARA 311/312 Hazardous chemical

No
Other federal regulations
Safe Drinking Water Act (SDWA) Not regulated.
Food and Drug Administration (FDA) Not regulated.
US state regulations This product does not contain a chemical known to the State of California to cause cancer, birth defects or other reproductive harm.
