1. Identification

Product identifier Loratadine Related Compound A

Other means of identification

- Catalog number: 1370280
- Chemical name: 8-Chloro-6,11-dihydro-11-(4-piperidinylidene)-5H-benzo[5,6]cyclohepta[1,2-b]pyridine
- Synonym(s): Desloratadine

Recommended use

Specified quality tests and assay use only.

Recommended restrictions

Not for use as a drug. Not for administration to humans or animals.

Manufacturer/Importer/Supplier/Distributor information

- Company name: U. S. Pharmacopeia
- Address: 12601 Twinbrook Parkway, Rockville, MD 20852-1790, US
- Telephone: RS Technical Services 301-816-8129
- Website: www.usp.org
- E-mail: RSTECH@usp.org
- Emergency phone number: CHEMTREC within US & Canada 1-800-424-9300, CHEMTREC outside US & Canada +1 703-527-3887

2. Hazard(s) identification

Physical hazards

Not classified.

Health hazards

- Acute toxicity, oral: Category 4
- Serious eye damage/eye irritation: Category 2A

OSHA hazard(s)

Not classified.

Label elements

Signal word

Warning

Hazard statement

Harmful if swallowed. Causes serious eye irritation.

Precautionary statement

Prevention

- Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Wear eye/face protection.

Response

- Rinse mouth. If swallowed: Call a poison center/doctor/medical professional/ if you feel unwell. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Storage

Not available.

Disposal

Dispose of contents/container to an approved disposal site.

Hazard(s) not otherwise classified (HNOC)

Not classified.

3. Composition/information on ingredients

Substance

Hazardous components

4. First-aid measures

Inhalation
Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact
Rinse skin with water/shower. Get medical attention if irritation develops and persists.

Eye contact
Rinse cautiously with water for several minutes. Get medical attention if irritation develops and persists.

Ingestion
Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed
Irritation of eyes and mucous membranes.

Indication of immediate medical attention and special treatment needed
Provide general supportive measures and treat symptomatically. Do NOT induce vomiting. Administer activated charcoal as a slurry. Consider gastric lavage soon after ingestion (within 1 hour). Protect airway by placement in Trendelenburg and left lateral decubitus position or by endotracheal intubation. Control any seizures first. For anticholinergic delirium, treat with physostigmine. In agitated patients with tachycardia, sedate with benzodiazepines. For severe tachycardia in hemodynamic compromise or ischemia, a short-active cardioselective drug, such as esmolol, should be used. For dysrhythmias, treat with intravenous lidocaine or sodium bicarbonate. For torsades de pointes in hemodynamically unstable patients, treat with electrical cardioversion. Treat stable patients with magnesium, isoproterenol, and/or atrial overdrive pacing. Correct electrolyte abnormalities. For seizures, administer diazepam or lorazepam. If seizures recur, treat with phenobarbital. Monitor for hypotension, dysrhythmias, respiratory depression, and need for endotracheal intubation. Evaluate for hypoglycemia, electrolyte imbalances, and hypoxia. For hypotension, administer isotonic fluid. If hypotension persists, treat with dopamine or norepinephrine. Administer for the following conditions: oral or intravenous diazepam for dystonia and intravenous benzodiazepines for agitation. For hyperthermia, sponge patient with tepid water and use fans. AVOID phenothiazines. If severe hyperthermia develops, neuromuscular paralysis may be necessary. [Meditext 2008]

5. Fire-fighting measures

Suitable extinguishing media
Water spray, dry chemical, carbon dioxide, or foam as appropriate for surrounding fire and materials.

Unsuitable extinguishing media
None known.

Specific hazards arising from the chemical
No unusual fire or explosion hazards noted.

Special protective equipment and precautions for firefighters
Wear suitable protective equipment.

Fire-fighting equipment/instructions
As with all fires, evacuate personnel to a safe area. Firefighters should use self-contained breathing equipment and protective clothing.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
Keep unnecessary personnel away. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Avoid inhalation of dust from the spilled material. Wear appropriate personal protective equipment.

Methods and materials for containment and cleaning up
Sweep up or vacuum up spillage and collect in suitable container for disposal. For waste disposal, see section 13 of the SDS. Wash spill site.

7. Handling and storage

Precautions for safe handling
As a general rule, when handling USP Reference Standards, avoid all contact and inhalation of dust, mists, and/or vapors associated with the material. Clean equipment and work surfaces with suitable detergent or solvent after use. After removing gloves, wash hands and other exposed skin thoroughly. Use of a designated area is recommended for handling of potent materials.

Conditions for safe storage, including any incompatibilities
Store in tight container as defined in the USP-NF. This material should be handled and stored per label instructions to ensure product integrity.
8. Exposure controls/personal protection

Exposure limit values

<table>
<thead>

</tr>
</tbody>
</table>

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls

Airborne exposure should be controlled primarily by engineering controls such as general dilution ventilation, local exhaust ventilation, or process enclosure. Local exhaust ventilation is generally preferred to general exhaust because it can control the contaminant at its source, preventing dispersion into the work area. An industrial hygiene survey involving air monitoring may be used to determine the effectiveness of engineering controls. Effectiveness of engineering controls intended for use with highly potent materials should be assessed by use of nontoxic surrogate materials. Local exhaust ventilation such as a laboratory fume hood or other vented enclosure is recommended, particularly for grinding, crushing, weighing, or other dust-generating procedures.

Individual protection measures, such as personal protective equipment

Eye/face protection

Safety glasses with sideshields are recommended. Face shields or goggles may be required if splash potential exists or if corrosive materials are present. Approved eye protection (e.g., bearing the ANSI Z87 or CSA stamp) is preferred. Maintain eyewash facilities in the work area.

Skin protection

Chemically compatible gloves. For handling solutions, ensure that the glove material is protective against the solvent being used. Use handling practices that minimize direct hand contact. Employees who are sensitive to natural rubber (latex) should use nitrile or other synthetic nonlatex gloves. Use of powdered latex gloves should be avoided due to the risk of latex allergy.

Other

For handling of laboratory scale quantities, a cloth lab coat is recommended. Where significant quantities are handled, work clothing may be necessary to prevent take-home contamination.

Respiratory protection

Where respirators are deemed necessary to reduce or control occupational exposures, use NIOSH-approved respiratory protection and have an effective respirator program in place (applicable U.S. regulation OSHA 29 CFR 1910.134).

Thermal hazards

Not available.

General hygiene considerations

Handle in accordance with good industrial hygiene and safety practice.

9. Physical and chemical properties

Appearance

White to off-white powder.

Physical state

Solid.

Form

Powder.

Odor

Odorless.

Odor threshold

Not available.

pH

Not available.

Melting point/freezing point

302 - 303.8 °F (150 - 151 °C)

Initial boiling point and boiling range

Not available.

Flash point

Not available.

Evaporation rate

Not available.

Flammability (solid, gas)

Not applicable.

Upper/lower flammability or explosive limits

| Flammability limit - lower (%) | Not available. |
| Flammability limit - upper (%) | Not available. |
| Explosive limit - lower (%) | Not available. |
| Explosive limit - upper (%) | Not available. |

Vapor pressure

Not available.

Vapor density

Not available.

Relative density

Not available.

Solubility in water

Slightly soluble.
Partition coefficient (n-octanol/water) Not available.
Auto-ignition temperature Not available.
Decomposition temperature Not available.
Viscosity Not available.

Other information
- Chemical family: Piperidine derivative.
- Molecular formula: C19H19ClN2
- Molecular weight: 310.83
- Solubility (other): Very soluble in ethanol and in propylene glycol; freely soluble in methanol, in methylene chloride, and in octanol; soluble in 0.1N hydrochloric acid and in dimethyl sulfoxide; slightly soluble in pH 7.4 phosphate buffer.

10. Stability and reactivity

Reactivity No reactivity hazards known.
Chemical stability Stable at normal conditions.
Possibility of hazardous reactions No dangerous reaction known under conditions of normal use.
Conditions to avoid None known.
Hazardous decomposition products NOx. Cl-. Irritating and/or toxic fumes or gases. Emits toxic fumes under fire conditions.

11. Toxicological information

Information on likely routes of exposure
- Ingestion Harmful if swallowed.
- Inhalation Due to lack of data the classification is not possible.
- Skin contact Due to lack of data the classification is not possible.
- Eye contact Causes serious eye irritation.

Symptoms related to the physical, chemical, and toxicological characteristics

Cross sensitivity Persons sensitive to loratadine may also be sensitive to this material.

Acute toxicity Harmful if swallowed.

Skin corrosion/irritation Based on available data, the classification criteria are not met.

Serious eye damage/eye irritation Causes serious eye irritation.

Local effects
- Irritancy test
- Result: Irritant.
- Species: Rabbit
- Organ: Eye
- Severity: Severe.
- Irritancy test
- Result: Non-irritant.
- Species: Rabbit
- Organ: Skin

Respiratory sensitization Due to lack of data the classification is not possible.

Skin sensitization Based on available data, the classification criteria are not met.
**Sensitization**
- Sensitization test
- Result: Non-sensitizing.
- Species: Guinea pig
- Organ: Skin.

**Germ cell mutagenicity** Based on available data, the classification criteria are not met.

**Mutagenicity**
- Ames assay
  - Result: Negative (with and without activation).
- Bone marrow micronucleus assay
  - Result: Negative.
- Species: Mouse
- Chromosomal aberration assay in human lymphocytes
  - Result: Negative.

**Carcinogenicity** Based on available data, the classification criteria are not met. This product is not considered to be a carcinogen by IARC, ACGIH, NTP, or OSHA.
- 16 mg/kg/day Carcinogenicity test
  - Result: No increase in tumors in males.
  - Species: Mouse
  - Test Duration: 2 years
- 32 mg/kg/day Carcinogenicity test
  - Result: No increase in tumors in females.
  - Species: Mouse
  - Test Duration: 2 years

**Reproductive toxicity** Based on available data, the classification criteria are not met.

**Reproductivity**
- 24 mg/kg Reproductivity test
  - Result: Increase in pre-implantation loss and a decreased number of implantations and fetuses.
  - Species: Rat
- 48 mg/kg/day Reproductivity test
  - Result: No increase in birth defects or malformations.
  - Species: Rat
- 60 mg/kg/day Reproductivity test
  - Result: No increase in birth defects or malformations.
  - Species: Rabbit

**Specific target organ toxicity - single exposure** Based on available data, the classification criteria are not met.

**Specific target organ toxicity - repeated exposure** Based on available data, the classification criteria are not met.

**Aspiration hazard** Based on available data, the classification criteria are not met.

**Ecological information**

**Ecotoxicity** No ecotoxicity data noted for the ingredient(s).

**Persistence and degradability** No data is available on the degradability of this product.

**Bioaccumulative potential** Not available.

**Mobility in soil** Not available.

**Other adverse effects** Not available.

**Disposal considerations**

**Disposal instructions** This product, in its present state, when discarded or disposed of, is not a hazardous waste according to Federal regulations (40 CFR 261.4(b)(4)). Under RCRA, it is the responsibility of the user of the product to determine, at the time of disposal, whether the product meets RCRA criteria for hazardous waste. Dispose in accordance with all applicable regulations.

**Local disposal regulations** Not available.

**Hazardous waste code** Not regulated.

**Waste from residues / unused products** Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

**Contaminated packaging** Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied.

**Transport information**

**DOT** Not regulated as a hazardous material by DOT.
IATA
Not regulated as a dangerous good.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
No information available.

15. Regulatory information

US federal regulations
CERCLA/SARA Hazardous Substances - Not applicable.
One or more components are not listed on TSCA.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

Hazard categories
Immediate Hazard - Yes
Delayed Hazard - No
Fire Hazard - No
Pressure Hazard - No
Reactivity Hazard - No

SARA 302 Extremely hazardous substance
No

SARA 311/312 Hazardous chemical
No

Other federal regulations
Safe Drinking Water Act (SDWA)
Not regulated.

Food and Drug Administration (FDA)
Not regulated.

US state regulations
This product does not contain a chemical known to the State of California to cause cancer, birth defects or other reproductive harm.
